

Unisto Security Seals for the sterilisation processes

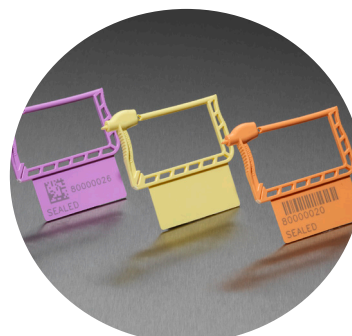

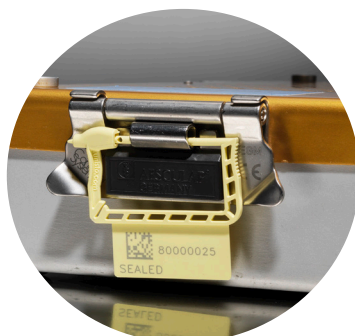

The new European Medical Device Regulation (MDR) defines the guidelines for placing medical devices on the market. The clear and reliable traceability of all phases of the sterilisation process is the responsibility of the Central Sterile Supply Department of hospitals and clinics.

Our new security seal Unisto Aviso optimises your sterilisation processes as well as the security process when sealing sterile containers.

Unisto Aviso's main features:

- Clear traceability by means of consecutive numbering and barcode
- Uniqueness of the security seal (no double execution guaranteed)
- Manipulation attempts are easily recognizable
- Certification according to ISO 9001 / ISO 17712: high quality and safety standards

Unisto Security Solutions for hospitals and clinics

Unisto Aviso

Specially developed for sealing sterilisation containers. Simple closure of the security seal thanks to the long locking clip. The indicator shows whether the seal has been correctly closed and at the same time prevents manipulation of the seal.

Unisto Comstar

First-class pull-through seal for the sealing of transport trolleys. New production method avoids weak points for a possible tampering attempt. Ribbon diameter 2.0 mm fits small eyelets.

Unisto Security Seals for tote boxes

Especially suitable for reusable containers which are transported within the logistics centres. The seals are easy to close and remove. Wide range of box seals available!

All the proposed Unisto security seals for the food industry are available in different colours, with number and barcode and customer logo.

We are happy to advise you on the best solution based on your requirements.
